Gamma Light Ambient Lamp

The Global Cognitive Decline Crisis

- Every 3 seconds, a new case of dementia is diagnosed worldwide. Medications cannot cure the disease, and prolonged use may lead to drug resistance.
- Alzheimer's disease accounts for 60–70% of dementia cases and is now the seventh leading cause of death globally.
- Caregiving costs are steadily increasing, placing growing pressure on families.

MIT study

40Hz light and sound stimulation reduced beta-amyloid and tau protein accumulation in Alzheimer's mouse models, improving cognitive function. Published in Nature.

KMU Clinical Validation

Clinical trials have confirmed that the product helps slow cognitive decline in patients with Alzheimer's disease, as published in Journal of Neurology (2024) 271:5425–5432.

Designed for peace of mind - where beauty meets brain health

A gracefully compact lamp that brings 40Hz wellness lighting into daily life — perfect for bedrooms, nighttime care, or peaceful moments of relaxation.

■ Timeless & Gracefully Compact

With its refined, space-conscious design, this lamp complements any interior style while adding a quiet touch of elegance.

■ Soothing Warm Glow

Emits a gentle, low-intensity warm light that creates a restful, sleep-friendly ambiance — ideal for evening use or caregiving environments.

■ A Thoughtful Gift of Wellness

Blending aesthetic appeal with brain-friendly innovation, it's a meaningful choice for personal wellness or heartfelt gifting.

Patented Multi-Frequency Technology

- While 40Hz light stimulation can activate brain function, its flicker effect may cause visual stress.
- **VitaShine Gamma Light** uses patented multi-frequency technology to integrate 40Hz light waves into regular illumination, allowing users to receive 40Hz brain stimulation without perceivable flicker.
- This technology has been validated through cellular experiments conducted by Kaohsiung Medical University, making it suitable as a brain wellness device.
